

**FUTURE
READY**
PAST PROVEN™

TLS-450

**MONDAY. 8 P.M.
THE SUNSET IS GOLDEN.
SO IS YOUR COMPLIANCE STATUS.**

 **VEEDER-ROOT**

INTRODUCING THE NEW TLS-450. READY FOR TODAY'S NEEDS AND TOMORROW'S CHALLENGES.

TLS-450

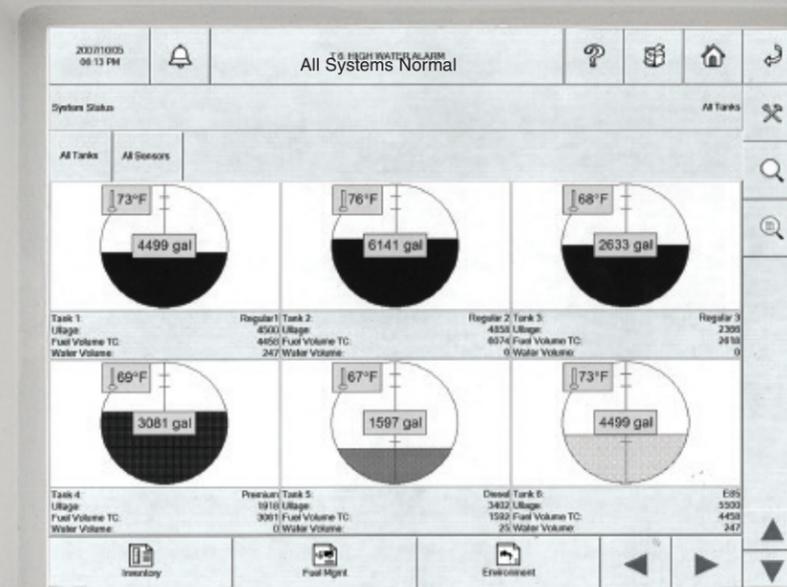

Future-ready technology.

Opens a virtual window
to your sites.

Customization that puts
you in control.

One-touch access to
everything.

Easy upgrade to TLS-450.

GOLDEN ANY WAY YOU LOOK AT IT.

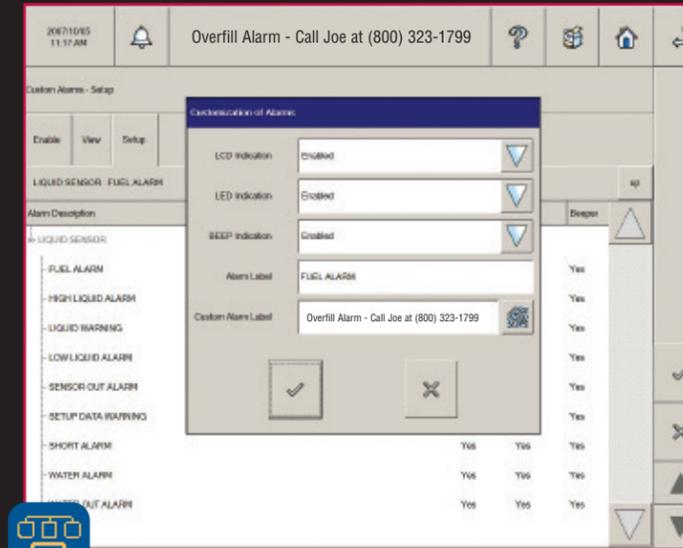

Future-ready technology

Reliability. Quality. Innovation. Service.

At Veeder-Root, we've delivered on those promises over 100,000 times worldwide. With our new TLS-450 platform, the same promises apply, along with benefits that will keep your stations several leaps ahead of an ever-changing environment.

Easy upgrade to TLS-450

Customization that puts you in control

Opens a virtual window to your sites

One-touch access to everything

Future-ready technology

With the TLS-450, you can quickly adapt to any change in the business and regulatory environment.

- ⇒ Newly designed software and hardware architecture for maximum speed, storage and flexibility.
- ⇒ Platform allows fast, easy integration of future services.
- ⇒ Upgrades can be performed easily on site or from a remote location.
- ⇒ Advanced CPU power for fast, comprehensive data processing.
- ⇒ Expanded memory lets you record, store and back up reports for up to three years.
- ⇒ Universal sensor/probe and input/output cards significantly reduce the number of console interface modules required for superior system flexibility and capacity.
- ⇒ Flexible and expanded communication port options, including USB and Ethernet TCP/IP.
- ⇒ Large VGA/LCD touch screen and advanced printing function.

Easy upgrade to TLS-450

- ⇒ Same footprint as TLS-300/350 models, using existing probes and sensors, for a perfect fit and seamless integration.

Opens a virtual window to your sites*

You can access and monitor your sites via any Web browser or the TLS-450 Direct Access™ Software.

- ⇒ The TLS-450 is a fully networked command center that lets you access and monitor your sites via any Web browser on your PC or PDA.
- ⇒ With the TLS-450 Direct Access™ Software, you can remotely control configurations, upgrades and downloads with the highest level of security.

* Requires Web connectivity or direct cable access.

Customization that puts you in control

You can configure the TLS-450 uniformly for every station, which helps you stay in compliance and lets you control what others see and access.

- ⇒ Allows you to customize your setup and ensure uniform configuration across all sites.
- ⇒ Alerts you to any modifications of your original setup for an extra measure of security.
- ⇒ Dashboard views of your site can be customized to meet your business management and operation needs.
- ⇒ Alarms, email notifications and a built-in “Help” function can be customized to ensure the fastest course of action to keep your sites in compliance.
- ⇒ Password protection lets you assign different levels of access to different users.
- ⇒ Supports multiple languages.

One-touch access to everything

User-friendly graphic interface makes local and remote programming and data access fast, easy and accurate.

- ⇒ Touch screen and graphic user interface for easy setup locally or remotely.
- ⇒ TLS-450 Direct Access™ Software mirrors the on-site graphic interface, making remote access and programming easy.
- ⇒ One-touch access to key functions, using intuitive icons.
- ⇒ Built-in “Help” menu provides step-by-step installation support for easy setup.
- ⇒ Smart universal plug & play modules automatically detect sensor and probe types for accurate, quick setup.

As environmental requirements change, the TLS-450 platform keeps you in total compliance, helping you monitor your sites and fuel inventory wherever you happen to be. So you can protect your assets, as well as the land, air and water. At the end of the day, that's what counts.

OPTIMIZE. CUSTOMIZE.

The TLS-450 offers a variety of options for access, control, data storage and business management. So you can tailor your system to fit the unique requirements of your operation. It's up to you, and we're here to make it simple.

Option 1: Total Access

Wherever you are, you can access or monitor your sites via any Web browser on your PC or PDA. And using the TLS-450 Direct Access™ Software on a PC, you can securely control and modify configuration, upgrades and diagnostics.

Option 2: Total Control

To make sure that all of your sites are under control, you can customize multi-level password access, alarms, email notifications, reports, built-in "Help" and dashboard views.

Option 3: Master Setup

From the factory, we can load in your setup specifications for uniform configuration across all sites, including passwords. This blocks unauthorized changes to your setup and notifies you of any modifications.

Option 4: Extended Storage

Back up your reports, alarms, compliance, inventory, delivery and reconciliation data for up to three years.

Option 5: AccuChart™

AccuChart™ calibrates and updates tank charts for accurate inventory level readings, while adjusted delivery reporting makes sure dispensing during delivery is considered.

Option 6: Automatic Reconciliation

Automatically manage your inventory with no guesswork about the sources of variance. Your sites will benefit from optimum inventory, better delivery scheduling and reduced risk of outages.
